

Custom Panel Series

G a r a g e D o o r s

The Custom Panel series of carriage style doors line is available in most sizes up to 18x10. Typically it is made up of 3 sections. It is an upward acting sectional door and comes in paint grade or stain grade. Its design potential fits the needs of homeowners, homebuilders, architects and garage door dealers on a tight budget.

In its standard format the framing components are of hemlock/fir and the panels are smooth hardboard when the door is to be painted and of mahogany when stained. The glass, which can be clear or obscure, fits behind a grid insert that forms the window design.

Options include raised panels, grooved panels, screen vents, mail slots and pre-priming. Finish painting or staining are also available.

This model mounts on standard 2 inch tracking. Track options include, Low Headroom track, Hi-Lift track, Roof Pitch track and others. Extended Life (Hi-Cycle) springs are also available.

All of the doors produced by Garage Doors, Inc. can also be motorized. We recommend the Liftmaster brand of garage door motors. Liftmaster offers a wide range of models including their new residential jackshaft unit –

Model LM3800. See www.liftmaster.com

We stand ready to assist from the early design phase through completion. The Custom Panel Series is yet another unique offering by Garage Doors, Inc. and the possibilities are endless!
