

Shown here are several samples from our Custom Panel Series. These "stile and rail" constructed doors are very affordable and can be painted or stained. There are hundreds of window styles available as well as many different panel dimensions, textures and profiles. We construct doors of the highest quality kiln dried wood. To protect the investment, all surfaces should be painted with an exterior grade paint prior to, or immediately after installation. Factory priming is available and recommended. This, in addition to a validating warranty, will protect the door from warping or damage due to interior or exterior temperatures or other weather conditions.

# Custom High Quality Wood Sectional Garage Doors

T-Venice

T-NewOrleans

T-Valencia

P-Mission

Garage Doors specializes in producing reasonably priced garage doors that feature the attractive, unique and distinctive use of wood to meet the needs of architects and customers alike. The rich look of wood gives variety to subdivisions and elegance to individual homes. Well crafted doors can be custom designed to blend with the architectural style of the home.

The standard sectional door designs shown represent just a small sampling of endless style variations. Our door systems can roll up, swing or slide. All can be motorized. Styles vary from rough to smooth, flat to raised and in any shape or design that a blueprint demands. All doors are custom built to meet aesthetic and architectural requirements.

**Cover Photo:** The Castlerock/New Orleans from our Model T Series represents our signature high-end designer carriage style door. The Model T is insulated and back paneled, providing a state-of-the-art solid core garage door system. It is offered in a variety of weather proven wood species including mahogany, cedar, oak, ipe and others. The design options are endless!
