Wildland Urban Interface (WUI) Upgrade Data Sheet

The WUI Upgrade is applied to the Model T and Plantation Series sectional garage door systems. These doors are upward acting garage door systems. They are typically produced in 3 or 4 sections. This upgrade was designed to meet the CDF Wildland Urban Interface Code, currently enforced in California. Its characteristics follow below:

Standard Features

1. Interior Back-Panel of Luan Mahogany plywood (5mm)
2. Core Framing of Hemlock-Fir and solid wood throughout with Deep Plow Joinery (1.375") (WUI Spec)
3. Ship-Lap style Weather-lock at Section Brakes
4. Face Material of MDO or Marine Mahogany plywood (.375" or .5")
5. Trim Material of MDO or Marine Mahogany plywood (.5")
6. Overall door thickness – 2.625 inches
7. Seamless Trim Design
8. Clear or Obscure Glass (double paned tempered 1 side minimum) – True Divided Lites (WUI Spec)
9. Exact Radius Matching for Arched Openings
10. Weather Stripping at concrete slab

Optional Features

1. Priming
2. Grooving to simulate Tongue and Groove patterns
3. Raised Panels
4. Beveled or Square Trim Profiles
5. Decorative Wrought Iron Faux Hardware
6. Exotic Plywood Species as face and trim
